☐ **FEDERAL**

**IMPACT:** State

**Summary of Legislation:** (Amended) This bill provides that in the event of a dispute concerning a request for a connection to enhanced wireless 911 systems or equipment leased or otherwise provided by a person to a public safety answering point (PSAP), the Utility Regulatory Commission shall determine the terms and conditions for the connection. This bill requires the Regulatory Flexibility Committee to study the revision of the Indiana statute governing enhanced wireless 911 systems to include Internet Protocol enabled services and other emerging technologies. The bill requires the Committee to report any recommendations resulting from its study to the Legislative Council not later than December 1, 2007.

**Effective Date:** July 1, 2007.

**Explanation of State Expenditures:** This bill will cause an indeterminable increase in expenditures of the Regulatory Flexibility Committee (RFC) by charging the RFC with studying revisions to Indiana law governing enhanced wireless 911 systems to include Internet Protocol enabled services and other emerging technologies. The budget for the RFC is set by the Legislative Council. It is estimated that requiring the RFC to study this topic will not result in an increase in the budget for the RFC.
